

Using Latisse™ is easy. Follow these instructions.

How to use

1. Once nightly, start by ensuring your face is clean, makeup and contact lenses are removed.
2. Remove an applicator from its tray. Then, holding the sterile applicator horizontally, place one drop of Latisse™ solution on the area of the applicator closest to the tip but not on the tip.
3. Then immediately draw the applicator carefully across the skin of the upper eyelid margin at the base of the eyelashes (where the eyelashes meet the skin) going from the inner part of your lash line to the outer part.
4. Blot any excess solution beyond the eyelid margin.
5. Dispose of the applicator after one use. Repeat for the opposite upper eyelid margin using a new sterile applicator. This helps minimize any potential for contamination from one eyelid to another.

Keep track of your Latisse™ lashes

Based on your treatment start date of ___/___/___

and your GEA starting grade of _____, with

consistent use as directed, you may expect to see significant improvement in overall eyelash prominence in 8 to 16 weeks

between ___/___/___ and ___/___/___

(date week range).¹
